

## Special Issue

# Human Papillomavirus from Lab to Life: Insights from Molecular Researches

### Message from the Guest Editor

Human Papillomavirus (HPV) affects a significant part of the population worldwide. Although the immunological system is usually able to clear the virus, some infections persist inducing a broad spectrum of cell abnormalities that range from benign proliferations to premalignant lesions at risk of progression to cancer. Approximately 4.5% (640,000 cases) of all new cancers diagnosed yearly worldwide are caused by persistent HPV infection. Despite an impressive amount of information on HPV infection has become available the last years, several gaps still remain regarding HPV disease. In this special issue we look forward promoting and recognizing research on HPV and HPV-associated diseases, focusing on molecular studies. We are calling for manuscripts dealing with biomarkers improving the identification of HPV-associated disease, prognostic markers and strategies of triage for HPV positive women. We aim to provide a broad overview of the ongoing research in the HPV world.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
