Recent Advances: Heterocycles in Drugs and Drug Discovery 2.0

Message from the Guest Editors

This Special Issue aims to collect recent developments in research on bioactive heterocyclic compounds. Both natural and synthetic heterocycles, including five-membered aromatic; six-membered aromatic; benzocondensed; polycyclic and non-aromatic heterocycles; metal complexes; molecules containing any heterocyclic moiety and their synthesis, biological activity, mechanism of action and potential application in the pharmaceutical field, will all be considered. Focused reviews will be included and will utilize the most recent literature (last five years).
