Molecular Insights into Chronic Liver Disease and Liver Failure

Message from the Guest Editor

Chronic liver disease represents a significant global health burden, affecting millions of people and leading to significant morbidity and mortality. The concept of chronic liver failure encompasses a wide range of underlying conditions and clinical manifestations, reflecting the complex and multifaceted nature of liver disease progression. A comprehensive understanding of the pathophysiology of chronic liver disease is essential to advance diagnostic, clinical, and therapeutic approaches. Recent research has provided new insights into disease mechanisms, enabling the development of more accurate diagnostic tools and targeted treatments. In addition, practical clinical methods are essential for the effective management of chronic liver disease in daily practice, providing clinicians with valuable strategies for patient care. This Special Issue invites contributions that address advances in the study of chronic liver disease, covering topics such as pathophysiological insights, innovative diagnostic techniques, clinical management, and therapeutic approaches.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
