Roles of Non-Coding RNAs in Cancer

Message from the Guest Editor

Non-coding RNAs (ncRNAs), including small non-coding RNAs like microRNAs (miRNAs) and piwi-interacting RNAs (piRNAs) and long non-coding RNAs (lncRNAs), play crucial roles in cancer development, cancer progression, and drug resistance. ncRNAs are known to act as both oncogenes and tumor suppressors and are therefore being explored as promising candidates for cancer biomarkers and therapeutic targets. In this Special Issue on 'Roles of Non-Coding RNAs in Cancer', we invite submissions that explore the roles of ncRNAs in cancer biology, including tumorigenesis, metastasis, drug resistance, and the development of targeted anti-cancer therapies.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
