Recent Molecular Research in Neuroimmunology

Message from the Guest Editor

The importance of B-cells in neuroimmunology is highlighted by the role of antibodies in different immune-mediated nervous system diseases, including myasthenia gravis, autoimmune encephalitis, and multiple sclerosis (MS). Antibodies can be a marker of viral infection, such as those against Epstein–Barr virus in MS, or pathogenic, as highlighted by autoimmune encephalitis and myasthenia gravis. In this Special Issue, we would like to highlight the importance of B-cell function and antibodies in neuroimmunology, particularly in progressive MS. Suitable topics include but are not limited to MS, progressive MS antibodies, B-cell function, myasthenia gravis, and autoimmune encephalitis.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
