

Special Issue

Immunomodulation of Skin Cancer

Message from the Guest Editor

Of all the tumors, skin cancers are extremely sensitive to immunotherapy. Immunotherapy is the use of agents to stimulate a person's own immune system to recognize and destroy cancer cells very effectively. It can be used to treat both melanoma and non-melanoma skin cancers. Despite the rise in the incidence on skin cancer, immunotherapy brings a lot of promise.

This special issue is expanding the current knowledge on immunoprevention and immunotherapy for management of melanoma and non-melanoma skin cancers. Experimental studies in in vivo models, review articles are all welcome for publication.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
