

Special Issue

Iron-Sulfur Clusters and Proteins

Message from the Guest Editor

Iron-sulfur (FeS) clusters are inorganic cofactors that are essential in several major biochemical processes in prokaryotic and eukaryotic organisms, including catalysis, electron transfer, determining of protein structure, and regulation of gene expression. In this Special Issue of *IJMS*, the focus will be on the most recent research advances in the field of FeS cluster assembly molecular mechanisms, FeS protein biogenesis and its regulation in numerous organisms, from bacteria to humans, and disease-associated FeS protein defects.

Guest Editor

Dr. Paola Costantini

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
