Advances in Molecular Research on *Candida* Resistance

Message from the Guest Editor

Candida species, particularly *Candida albicans*, *Candida auris*, and other emerging pathogens, are leading causes of both superficial and invasive infections. The rapid development of resistance to available antifungal treatments poses a significant challenge to public health. In particular, the persistence of biofilms and genetic plasticity of *Candida* strains contribute to the complexity of managing these infections. This Special Issue will focus on the latest molecular advancements in understanding *Candida* resistance, shedding light on the mechanisms behind antifungal resistance, biofilm formation, and persistence. The goal of this Special Issue is to highlight new strategies for combating *Candida* resistance, including novel therapeutic approaches, the repurposing of existing drugs, and the development of advanced antifungal agents. We welcome original research articles and reviews that explore molecular insights into the resistance pathways, biofilm dynamics, and host–pathogen interactions of *Candida* species.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
