

Special Issue

Nutrition and Cancer: Molecular Mechanisms between Nutrition and Cancer Etiology, Prevention, and Treatment

Message from the Guest Editors

This Special Issue focuses on the effects and the underlined molecular mechanisms of nutrition and cancer etiology, prevention, and the treatment of cancer, including epidemiological effects. This Special Issue also focuses on the molecular mechanisms underlining etiological factors through clinical and experimental research. Original research as well as review articles on the molecular mechanisms related to the nutritional assessment and management of cancer patients in association with disease progression, prognosis and cotreatment with standard therapy and a quality-of-life assessment are welcome. Topics of this Special Issue include, but are not limited to: Nutritional assessment and management of cancer patients; Etiological factors and clinical and experimental research, carcinogenesis, and epidemiology in cancer; Nutrition and disease progression, prognosis and cotreatment with standard therapy and a quality-of-life assessment of cancer patients; Nutritional prevention with the use of clinical and experimental research. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
