## Etiology and Research Progress of Chronic Kidney Disease

### Message from the Guest Editors

We are delighted to present a Special Issue in the *International Journal of Molecular Sciences*: “Etiology and Research Progress of Chronic Kidney Disease”. Chronic kidney disease (CKD) is becoming an increasingly serious public health concern; the global burden is rising due to its high morbidity and mortality. Accurate progression monitoring and prognosis improvement of CKD are extremely significant with regard to improving the clinical treatment and management of the disease and reducing the social burden. Several biomarkers reported in recent years could play important roles in accurate progression monitoring and prognosis improvement of CKD. Animal studies suggest that interstitial fibrosis could be reversed and could therefore be a therapeutic target in the prevention of CKD progression. We need to improve our understanding of early mechanisms of CKD, which will consequently enable early therapeutic intervention and delay the progression of CKD—or even reverse it. *International Journal of Molecular Sciences* is proud to offer a platform to promote and highlight invaluable research on the Etiology and Research Progress of Chronic Kidney Disease.

### Guest Editors

Dr. Silvia De Rosa

Centre for Medical Sciences—CISMed, University of Trento, Via S. Maria Maddalena 1, 38122 Trento, Italy

Dr. Marco Fiorentino

Department of Precision and Regenerative Medicine and Ionian Area (DiMIPRE-J), University of Bari “Aldo Moro”, 70124 Bari, Italy

### Deadline for manuscript submissions

closed (31 March 2024)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
