

## Special Issue

# Current Molecular Science of Fragile X Syndrome and Associated Disorders

### Message from the Guest Editors

This special issue titled “Current Molecular Science of Fragile X Syndrome and Associated Disorders” will be edited by Flora Tassone PhD and Randi Hagerman MD, both from the MIND Institute at University of California Davis Medical Center. It will cover advances in our understanding of molecular pathways that underlie fragile X syndrome and premutation disorders. Animal, cellular, and human studies will be highlighted.

Phenotype research as it relates to the molecular basis are encouraged. Biomarker studies and gene therapy studies are welcome. Basic research, translational research and the results of clinical trials are welcome. We are interested in original research, reviews and even case reports for this special issue in IJMS.

---

### Guest Editors

Prof. Dr. Flora Tassone

1. Medical Investigation of Neurodevelopmental Disorders (MIND) Institute, UC Davis Health, Sacramento, CA, USA
2. Department of Biochemistry and Molecular Medicine, School of Medicine, University of California, Davis, CA, USA

Prof. Dr. Randi Hagerman

Medical Investigation of Neurodevelopmental Disorders (MIND) Institute, Department of Pediatrics, UC Davis Health, Sacramento, CA, USA

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
