Endothelial Cell Signaling

Message from the Guest Editor

Endothelial cells play a critical role in the control and coordination of vascular function by working as a signal integration centre in the communication of diverse cell types of the circulatory system. One important mechanism of endothelial cell signaling is mediated by the release of autocrine/paracrine signals. Although connexin hemichannels (i.e., half of gap junction channel) and pannexin channels may contribute to the release of autocrine/paracrine signals, endothelial cell signaling also relies on direct gap junction channel-mediated communication with other cells of the vessel wall, such as smooth muscle cells, and cells that circulate in the blood stream, such as leucocytes. As cell homeostasis depends on the proper function of the vascular system, it is essential to improve and advance our understanding of the integrative regulation of vascular function by endothelial cell signaling. Therefore, original research articles, comprehensive reviews and novel communications related to the physiology, biochemistry and molecular biology of endothelial cell signalling in health and disease will be considered for this Special Issue.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
