Addressing Autoimmunity in the 21st Century

Message from the Guest Editor

The 21st century is seeing a continued increase in the incidence of autoimmune diseases, diseases that feature an immune-mediated attack on the body's own organs. Reported increase in the prevalence of cellular and molecular markers of autoimmune diseases, such as antinuclear antibodies, further supports a dynamic landscape of autoimmune disease pathogenesis. In this Special Issue, we invite researchers to publish reviews or original research papers that address the current challenges in autoimmune diseases, from molecular mechanisms to therapeutic strategies. Our goal is to improve understanding and clinical management of these diseases as they become serious health concerns worldwide.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
