Fifty Years of Targeted Therapy in Cancer: Past, Present and Future

Message from the Guest Editor

Targeted therapy is a type of cancer treatment that targets specific molecules or proteins within cancer cells that are involved in the growth and spread of the tumor. These therapies are designed to inhibit the growth and spread of cancer cells while minimizing harm to normal cells. Examples of targeted therapies include monoclonal antibodies, small molecule inhibitors, and kinase inhibitors. These therapies are often used in combination with other treatments such as chemotherapy, radiation therapy, and surgery.

This Research Topic will provide an academic platform to discuss how different candidate therapeutic drugs can be used against deregulated regulatory pathways in TME. We invite authors to contribute original research and review articles testing the mechanism of action of natural and chemically synthesized bioactive products on various cancer types through the regulation of different molecular pathways (including suppression and overcoming resistance).

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
