Enzymes Involved in Amino Acid Metabolism: Molecular Structure and Function

Message from the Guest Editors

Enzymes involved in the metabolism of amino acids represent key players in human health, and their alterations are associated with inherited metabolic disorders, neurologic diseases, cancer, and even chronic diseases such as cardiovascular and kidney disorders. Recent advances in genomics and metabolomics have uncovered new aspects of amino acid metabolism and provided insights that can be used in the implementation of novel therapeutic approaches and strategies for personalized medicine. Papers focusing on the role of the enzymes involved in amino acid metabolism in human health and disease will be considered for this Special Issue. Experimental and bioinformatics papers, up-to-date review articles, and commentaries are also welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
