Eye Diseases: From Pathophysiology to Novel Therapeutic Approaches

Message from the Guest Editors

The progress made in clinical and experimental ophthalmology in recent years is remarkable. It would not be possible without developments in our progressively better understanding of the pathophysiology of eye diseases. New medicines and therapeutic strategies which have been introduced and implemented into everyday clinical practice are consequences of the work of laboratory experiments and observations on genetic, biochemical, proteomic, cellular, and physiological levels. In this Special Issue, entitled "Eye Diseases: From Pathophysiology to Novel Therapeutic Approaches", we welcome authors to submit papers that highlight new achievements in these fields. We encourage submissions focused on the molecular mechanisms underlying eye diseases and innovative therapeutic approaches, rooted in molecular research. We hope that improving our knowledge and outlining the most recent achievements in molecular insights brings new therapeutic possibilities to help rescue vision and inspires our readers and scientists by the new discoveries in both experimental and clinical ophthalmology.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
