Molecular Insights into Allergic Asthma

Message from the Guest Editor

Allergic asthma is the most widespread form of asthma. Its prevalence continues to rise in the third millennium due to complex interactions between genetic and environmental factors. Phenotyping, endotyping, and elucidating the mechanisms underlying allergic asthma are crucial for enabling clinicians to optimize treatment options and improve clinical outcomes for patients. Beyond IgE and Type 2 inflammation, additional immunological pathways contribute to the clinical signs and symptoms of allergic asthma. Inflammation of the bronchial epithelium—acting not only as a physical barrier but also as an immunological resource—further exacerbates disease burden. Various cell types, particularly eosinophils, play a key etiologic role. This *IJMS* Special Issue aims to collect both original research or review articles to advance the understanding of allergic asthma and its underlying mechanisms.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
