

Special Issue

New Chemo-, Regio- and Stereoselective Reactions and Methods in Organic Synthesis

Message from the Guest Editor

The development of new reactions and methods in organic synthesis is an extensive and multifaceted area of research. This special issue will focus on the recent achievements of modern organic synthesis and the development of new chemo-, regio- and stereoselective reactions and methods, as novel approaches to practically valuable compounds, including biologically active and natural products. The special issue welcomes original research papers or review articles from colleagues involved in the development of new reactions and synthetic methods. Contributions may cover all aspects of synthetic research, including design, synthesis, functionalization, application of new reagents and catalysts, and combinations of state-of-the-art experimental and computational methods. I believe that this Special Issue will highlight the latest advances in the development of new chemo-, regio- and stereoselective reactions and methods and will be of interest to a wide range of colleagues working in many areas of synthetic research.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
