

## Special Issue

# Lung Diseases and Lung Transplantations: Molecular Pathogenesis and Advanced Therapies

### Message from the Guest Editor

**Lung transplantation** is an increasingly therapeutical option for patients with severe end-stage pulmonary disease in a highly selective population. This Special Issue comprehensively delves into the intricate realm of **lung diseases and lung transplantations**. From understanding the origins of pathogenesis to the latest advancements in therapeutic approaches, our special edition provides a holistic view of the field. Our focuses will be comprehensive understanding of lung diseases and transplantation, including Molecular Insights; Transplantation Advances and Therapeutic Strategies.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
