Molecular Advances in Neuromuscular Disorders: Spinal Muscular Atrophy and Beyond

Message from the Guest Editors

Neuromuscular disorders are a group of neurodegenerative disorders characterized by degeneration of spinal motor neurons leading to muscle atrophy and life-threatening conditions. This Special Issue will focus on the molecular advances in the fields of spinal muscular atrophy (SMA), amyotrophic lateral sclerosis (ALS) and other motor neuron diseases, including SMA with respiratory distress type I (SMARD1).

Guest Editors

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
