

Special Issue

Molecular Aspects of Heart Failure: Identifying New Drugs and Therapy Targets

Message from the Guest Editor

We are pleased to invite you to submit your scientific articles to our upcoming Special Issue, titled "*Molecular Aspects of Heart Failure: Identifying New Drugs and Therapy Targets*". Heart failure remains a major global health challenge, necessitating innovative approaches to understand its molecular underpinnings and to develop effective treatments. This Special Issue aims to showcase cutting-edge research that advances our knowledge of the molecular mechanisms involved in heart failure and highlights promising therapeutic targets and novel drug candidates. We welcome original research articles, comprehensive reviews, and insightful case studies that focus on, but are not limited to, the following topics:

- Molecular pathways and mechanisms contributing to heart failure;
- Identification and validation of new therapeutic targets;
- Development and testing of novel drugs for heart failure;
- Genomic and proteomic approaches to understanding heart failure;
- Biomarkers for diagnosis, prognosis, and therapeutic response;
- Translational research bridging molecular findings to clinical applications.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
