Cutting Edge Advances in Antitumor Properties of Natural Products

Message from the Guest Editors

Cancer is a complex disease with diverse cell types, making treatment challenging. Traditional therapies like chemotherapy and radiation affect both cancerous and healthy cells, often causing severe side effects. Despite advancements in drug development, cancer remains difficult to control due to its ability to adapt and develop resistance. Natural products are gaining attention for their ability to target multiple pathways involved in cancer, influencing processes like cell proliferation, inflammation, apoptosis, angiogenesis, and metastasis. They offer advantages such as minimal toxicity, chemical diversity, and the potential to overcome drug resistance. This Special Issue seeks original research and reviews exploring how natural products affect tumor progression, providing insights into their therapeutic potential.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
