

## Special Issue

# Molecular Mechanisms of Cell Adhesion

### Message from the Guest Editor

Cell adhesion is a pivotal physiological process in multicellular organisms including humans and animals. A set of protein families, e.g., integrins, cadherins, selectins and the immunoglobulin superfamily of proteins, is primarily involved in cell–cell and cell–matrix adhesion functions. In this Special Issue, we would like to solicit in-depth review articles and original research papers in the area of cell adhesion. Additionally, the current development of drugs or therapeutics targeted to cell-adhesion complexes are of interest.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
