Latest Updates about Interstitial Lung Disease

Message from the Guest Editors

Interstitial lung diseases (ILDs) comprise more than 200 entities with different clinical, radiological, and pathological presentations, but they share one common feature—involvement of the lung interstitium.

Two antifibrotic drugs slowing the progression of fibrosis were developed in the last decade, but we as respiratory specialists still struggle with the problem of decreased survival and a lack of a cure for our patients.

This Special Issue will especially concern:

Molecular and genetic disorders related to the pathogenesis of ILDs;
New perspectives in the treatment of progressive pulmonary fibrosis (including personalized medicine);
Environmental exposures as the risk factors of ILD development;
Lung transplantation in patients with ILDs;
Links between ILDs and pulmonary neoplasms;
ILDs as a risk factor for thromboembolic disease;
COVID-19 as a possible trigger of ILDs.

We hope that the published articles will contribute to the scientific discussion concerning these extremely interesting and still underexplored group of diseases.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
