

## Special Issue

# Molecular Mechanisms of Acute Lung Injury

### Message from the Guest Editor

With the exception of a few specialized conditions, there is currently no specific treatment for acute lung injury. Therefore, further exploration of the mechanisms involved in acute lung injury and therapeutic targeting of newly discovered mechanisms is warranted. For this Special Issue, we invite both original research articles as well as comprehensive reviews addressing mechanisms of acute lung injury and novel therapeutic strategies.

- Novel models of acute lung injury;
- Mechanisms and treatment of SARS-Cov-2-induced acute lung injury;
- Mechanisms and treatment of influenza-virus-induced acute lung injury;
- Acute lung injury in vulnerable populations: pediatric, geriatric, pregnant, underlying conditions;
- Mechanisms and treatment of acute lung injury caused by toxic gases;
- Acute lung injury following cutaneous burn: thermal, chemical, electrical;
- The role of non-encapsulated heme in acute lung injury: hemorrhage, hemolysis, sickle cell disease, other hemoglobinopathies;
- Heme elimination strategies for the treatment of acute lung injury;
- Sepsis-associated acute lung injury;
- Acute lung injury following aspiration.

---

### Guest Editor

Dr. Tamás Jilling

Department of Pediatrics, University of Alabama at Birmingham School of Medicine, 1700 6th Avenue South, Birmingham, AL 35233, USA

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
