

## Special Issue

# Molecular Pharmacology of Cardiovascular Disease, 2nd Edition

### Message from the Guest Editor

This Special Issue continues our previous Special Issue titled “Molecular Pharmacology of Cardiovascular Disease”. Cardiovascular diseases represent the leading cause of death in developed countries. Although numerous interventions aim to educate people on a healthy lifestyle, most cardiovascular patients require pharmacological management. The increased rhythm of technological advances permits the creation of more efficient and personalized types of pharmacological treatments. In this Special Issue, we continue to present papers dealing with the newest research in molecular cardiovascular pharmacology. We welcome reviews and original research papers from fundamental and clinical research addressing issues from all branches of cardiovascular pharmacology.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
