

Special Issue

Advances in Genetics, Epigenetics and Postharvest Biology of Fruits

Message from the Guest Editor

The economic losses caused by the postharvest decay of fruits are enormous. The pre- and postharvest biology and technology are important to maintain the quality and flavor of fruits, and to avoid economic losses.

Understanding the molecular mechanisms of fruits in response to pre- and postharvest ripening and senescence, chilling injury, browning, pathogen infection, etc., is important for the storage of fruits and for extending their shelf-life. This Special Issue, entitled 'Advances in Genetics, Epigenetics and Postharvest Biology of Fruits', will explore advances in the pre- and postharvest biology and technology of fruits, and promote the development of fruit storage technologies. Both original articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
