Lactoferrin, the Moonlighting Protein of Innate Immunity

Message from the Guest Editors

Lactoferrin (Lf) is currently recognised as a potent multi-targeting nutraceutical, endowed with immunomodulatory, anti-inflammatory, anti-oxidant and anti-cancer properties. At mechanistic level, some of the functions exerted by Lf have been related to both its iron-binding ability and its highly cationic charge. However, most of its biological effects still need to be fully appreciated. Moreover, Lf is emerging as a powerful carrier for the delivery of biologically active nanoparticles.

This Special Issue is focused on investigating new structural and functional properties of Lf from different species, including bovine Lf, which has mostly been applied in in vitro, in vivo and clinical studies. Areas to be covered may include but are not limited to the relation between molecular structure and function, interaction with other proteins, regulation of intracellular pathways, development of new technologies aimed to improve its bioavailability, applications as scaffold for nanoparticle delivery. Original papers and review articles on these and related topics are welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
