

Special Issue

Deep Learning and Machine Learning in Bioinformatics

Message from the Guest Editors

In recent years, deep learning has been spotlighted as a highly active research field with great success in various machine learning communities, such as image analysis, speech recognition, and natural language processing; now, its promising potential is being actively discussed in the field of biomedicine. In particular, a dramatically increasing number of deep-learning-based approaches have been proposed in biomedical image and signal processing. However, the application of deep learning in other biomedical areas, such as genomics and computational biology, has been rather limited due to the difficulty of definition and interpretation of deep learning architecture. Moreover, there are still many challenging open problems in deep learning that need to be solved to allow its active use in the field of bioinformatics.

In this Special Issue, we envision that the application of deep learning and novel machine learning methods to biological problems will provide practical guides and useful solutions to improve predictive performance and enhance our understanding of biological mechanisms of target diseases.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
