Emerging Role of Lipids in Metabolism and Disease

Message from the Guest Editors

Although initially regarded as a passive method of energy storage, lipids are now considered molecules with pivotal structural and functional roles. Notably, they serve as integral components of cellular membranes and act as crucial messengers in the regulation of cell homeostasis. In recent years, the role of lipids in homeostasis maintenance, derived from both nutrition and endogenous biosynthesis, attracted the interest of several researchers because of its involvement in human health. Lipid disorders are at the root of several diseases characterized by altered lipid metabolism in different tissues. Metabolic syndrome and cardiovascular disease, for instance, are closely related to these metabolic dysfunctions. Moreover, connections with misbalances of cholesterol homeostasis in neurodegenerative and neurodevelopmental disorders have also been demonstrated. Thus, the aim of this Special Issue is to gather research papers focused on this topic and, therefore, bring to the forefront new insights into physiopathological aspects of lipid disorders.

Guest Editors

Prof. Dr. Valentina Pallottini

1. Neuroendocrinology Metabolism and Neuropharmacology Unit, IRCSS Fondazione Santa Lucia, Via del Fosso Fiorano 64, 00143 Rome, Italy

2. Department of Science, Section Biomedical Science and Technology, University Roma Tre, Viale Marconi 446, 00146 Rome, Italy
Dr. Marco Segatto

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
