# Lipopolysaccharide Assembly and Modifications in Gram-Negative Bacteria

### Message from the Guest Editors

Dear colleagues✉

The most defining feature of Gram-negative bacteria is the presence of an asymmetric outer membrane (OM), with phospholipids facing its inner leaflet and lipopolysaccharide (LPS) on the outer surface. LPS is generally essential, constituting the major component of OM and is the causative agent of sepsis. LPS is a complex glycolipid comprised of a hydrophobic membrane-anchored lipid A and a core oligosaccharide. The biosynthesis of LPS and assembly requires more than 50 genes and many of them are essential and being unique to bacteria are targets for the discovery of new antibiotics. LPSs are potent activators of mammalian immune system. Bacteria often alter their LPS composition, due to changes in acylation, modifications of LPS core and lipid A part, which often confer antibiotic resistance or evade detection by immune system. Recent studies have unraveled novel essential components in the regulation of a tight balance between LPS and phospholipid content, LPS transport to the OM and role of cardiolipins. In this issue, diversity of LPS structure, its modifications, assembly of LPS and detection of LPS by host immune system will be covered.

### Guest Editors

Prof. Dr. Satish Raina

Unit of Bacterial Genetics, Gdansk University of Technology,  
Narutowicza 11/12, 80-233 Gdansk, Poland

Dr. Gracjana Klein

Unit of Bacterial Genetics, Gdansk University of Technology,  
Narutowicza 11/12, 80-233 Gdansk, Poland

### Deadline for manuscript submissions

closed (15 November 2022)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
