

## Special Issue

# Biopolymers in Tissue Engineering

### Message from the Guest Editor

Biopolymers have great potential for application in tissue engineering due to their biocompatibility. At present, biopolymers such as hydrogels, cellulose, peptides, alginate, polysaccharides, hyaluronic acid, collagen, and chitosan have developed corresponding applications in the tissue engineering market. This Special Issue aims to present new knowledge and covers all the topics relevant to biopolymers in tissue engineering. We invite researchers to contribute with either original research or review articles. The prospective authors are encouraged to explicitly indicate the originality of their novel techniques in cover letters and abstracts.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
