

Special Issue

Major Histocompatibility Complex (MHC)

Message from the Guest Editors

The role of HLA genes and molecules, as well as the entire MHC gene region, is crucial in histocompatibility, infections and autoimmune diseases. While the knowledge on the immense variation in MHC inside and between populations has grown, the use of novel DNA- and cell molecular-technologies have become feasible and cost-effective. A Special Issue on the “Major Histocompatibility Complex” in the *International Journal of Molecular Sciences* is therefore much warranted and timely. The Special Issue on MHC is now open to receive manuscripts on all aspects of this highly variable genomic region with particular emphasis on recent advances in the role of variation outside of the classical HLA class I and II polymorphism, both in disease susceptibility and histocompatibility. We are honored to have been invited to be guest editors for this issue and look forward to reading your contributions on MHC-related research.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
