Mechanisms and Interventions for Neurological and Psychological Disorders

Message from the Guest Editors

Neurological conditions affect the brain, the spinal cord, and nerves found throughout the body. There are over 600 neurological conditions that affect humans, some of which include, dementia, epilepsy, multiple sclerosis, motor neuron disease, and headache (see keywords for other neurological disorder examples). Abnormalities in the brain, spinal cord or nerves including structural, biochemical or electrical leads to symptoms of a neurological condition. Some symptoms include muscle weakness, loss of coordination and sensation, seizures, paralysis, etc. The causes of neurological disorders vary but can be due to infections, tumors, environmental, lifestyle, genetic, congenital, trauma. This Special Issue aims to collect contributions related to mechanisms of disease including at the molecular, cellular, genetic, biochemical and immunological levels. We also seek articles on interventions used to manage these disorders.

Guest Editors

Dr. Majid Davidson
Prof. Dr. Vasso Apostolopoulos
Prof. Dr. Tissa Wijeratne

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
