Sarcomas: From Molecular Insights to Personalized Therapies

Message from the Guest Editor

Sarcomas, which are rare and heterogeneous mesenchymal malignancies, are challenging to treat with targeted therapies. However, multi-omics analyses of sarcoma tissues and systemic studies of tumor suppressors and oncogenes across multifocal systems have highlighted several potential therapeutic strategies. To develop these strategies further, collaborative brainstorming is essential. To facilitate this, we are seeking submissions of regular articles, short communications, and reviews pertaining to the following topics: New biomarkers for the diagnosis, prognosis, and treatment of advanced sarcomas. Mechanisms of action of molecules that are involved in sarcoma development or effective in treatment. Experimental models for screening and identifying molecules that inhibit sarcomagenesis. Novel insights into sarcomas; these may be subtype-specific or applicable to various forms of sarcoma. Clinical factors associated with prognosis and sarcoma progression.

This Special Issue will further the development of personalized therapeutic strategies and improve clinical outcomes for patients with advanced sarcomas.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
