

Special Issue

Novel Approaches in Drug Discovery: From Natural Products to Therapeutic Innovations

Message from the Guest Editor

The theme of this Special Issue focuses on cutting-edge research that takes the utilization of natural products as a starting point and pursues innovative approaches from there to the development of new therapeutic approaches. Natural products have been widely used as the basis for pharmaceuticals since ancient times. Their complex and rich chemical structures are recognized as invaluable resources in the design and development of pharmaceuticals.

This Special Issue of IJMS highlights these innovative research and practical examples, and aims to envision the future of drug discovery from both academic and industrial perspectives. It will provide readers with great inspiration and insight by showing how advances in natural product research in drug development and next-generation technologies will converge to result in new treatments and drugs. We look forward to a variety of reviews from the basic research field to the clinical field and beyond.

Guest Editor

Prof. Dr. Kazuhiko Nakadate

Department of Functional Morphology, Meiji Pharmaceutical University,
Tokyo 204-8588, Japan

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
