Applications of Mesenchymal Stem Cells in Neuroscience

Message from the Guest Editors

Multipotent Mesenchymal Stem Cells (MSC) have recently become very popular in cell therapy applications due to their multifaceted properties. MSC are emerging as an extremely attractive tool due to their ability to release a proactive secretome composed of soluble factors and/or extracellular vesicles. MSC offer practical advantages for clinical applications because they can be isolated from adults with minimally invasive procedures. Applications of MSC or their by-products are now studied for the treatment of many neurological disorders, including neurodegenerative and traumatic conditions for which there is no ideal cure to date. The purpose of this Special Issue is to provide an overview of the current status of MSC application in neurological conditions and to delineate the current foundations for possible future applications in this field.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
