

Special Issue

Molecular, Translational and Clinical Research of Cancer Structural Biomarkers

Message from the Guest Editor

This issue of IJMS is dedicated to cancer structural biomarkers and follows a theme of previous issues that were focused on cancer biomarkers and informatics and on cancer biomarkers, their mechanisms and potential therapies. Structural biomarkers in cancer are such markers that modulate cellular and nuclear structures which in turn change cellular behaviour. This process is often dynamic and has cancer stage-specific manifestations. Examples of structural biomarkers in cancer may include modulators of extracellular matrix, of nuclear and genome organization, or aberrant DNA, protein, RNA or lipid structures. We are looking for manuscripts that highlight structural cancer biomarker discovery research and/or translational research and/or demonstrate the clinical relevance of the structural biomarkers for cancer patients. Diagnostic, prognostic and treatment relevance are important hallmarks in this field, and studies addressing these topics are welcome.

Guest Editor

Prof. Dr. Sabine Mai

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
