Molecular Advances in Alcohol Metabolism

Message from the Guest Editor

Alcohol metabolism (AM) is the primary internal factor that regulates the effects of alcohol, such as cell toxicity, intoxication, and dependence formation. This Special Issue, Molecular Advances in Alcohol Metabolism, welcomes reviews and articles on the latest studies on the contribution of alcohol metabolizing enzymes to AM in vivo and their relationship with the biological effects of alcohol. A comprehensive understanding of the molecular mechanism of AM, coupled with the biological effects of alcohol, can provide the most important foundation in alcohol medical research, which aims to solve, treat, and prevent social and health problems caused by drinking.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
