State-of-the-Art Macromolecules in Italy

Message from the Guest Editors

We are pleased to announce a call for submissions for a Topical Collection of the *International Journal of Molecular Sciences* dedicated to the development of novel biotherapeutics in Italy, including bioactive peptides, recombinant proteins, natural and plasma-derived proteins, monoclonal antibodies, antibody fragments, DNA and RNA fragments, PNAs, other DNA/RNA surrogates, and bio-materials. A deeper understanding of the molecular, structural, functional and analytical properties of these molecules is the main requirement to progress towards their preclinical and possibly clinical testing in both academic and industrial research groups, and papers on these topics are often the seminal works in their development as valuable products. We therefore encourage the submission of research articles, reviews and commentaries on one or more of these topics by Italian research groups of all backgrounds who are actively working in this field.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
