

Special Issue

Materials for Infectious Diseases

Message from the Guest Editors

While researchers were working hard on possible solutions to address infectious diseases such as Ebola, SERS, MARS, and Nipah that are still causing public health threats worldwide and specifically in many developing countries, another infectious disease emerged, resulting in the COVID-19 pandemic. Millions of patients are now suffering from this infectious disease and even more are facing its side effects, such as socioeconomics troubles, and there is not yet any available treatment. This Special Issue on “Materials for Infectious Diseases” will cover original/review/clinical/translational study papers related to the applications of emerging/advanced materials in different aspects of infectious diseases, covering prevention, diagnosis, and treatment, as well as the features that materials should bear in order to enter clinical trials.

Guest Editors

Prof. Dr. Francesco Trotta

Dr. Fabrizio Caldera

Prof. Dr. Ali Zarrabi

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
