## Special Issue

## Mechanism and Regulation of Pre-mRNA Splicing

## Message from the Guest Editor

In eukaryotes, most gene transcripts or pre-mRNAs are interrupted by intervening sequences termed introns, which are precisely removed by a process called splicing. This process is essential since spliced mRNAs serve as templates for proteins. Regulation in the splicing process is certainly crucial for a wide variety of biological and physiological phenomena. The process is therefore highly discriminatory and faithful, and misregulation in this process causes disorders in cell functions, often with severe clinical consequences. This Special Issue will cover, but is not limited to, the following topics:

The mechanism and regulation of constitutive and alternative splicing; The mechanism and regulation of splicing-linked post-splicing processes; Pre-mRNA-protein interactions involved in splicing and splicing-linked processes; hnRNP/mRNP assembly and functions in splicing and splicing-linked processes; Evolutional studies of pre-mRNAs and splicing; Pre-mRNA processing in development and diseases including cancers.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## **Editor-in-Chief**

#### Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:
