

## Special Issue

# Molecular Research and New Therapy in Melanoma and Other Skin Cancers

### Message from the Guest Editor

Although we are experiencing increasing success in skin cancer therapy (especially malignant melanoma) by using immune checkpoint inhibition (ICI-) mono as well as combined therapy, skin cancer is still the most frequent cancer in the white population. The reasons for this are primary and secondary (acquired) resistance against modern ICI therapies as well as missing information about basic molecular events which induce skin cancer and therapy resistance. Therefore, there is an urgent need to increase evidence-based knowledge in the field of molecular oncology, personalized diagnostics, precision medicine and predictive assays to find early diagnostic, progression and predictive molecular biomarkers to monitor skin cancer. Topics that should be focused on in the future involve (beside others): tumor heterogeneity, tumor-microenvironment interaction (e.g., via exosomes), skin cancer biomarkers, transcriptomics, proteomics, epigenomics, immunomodulation, and the use of high throughput technologies. The main feature of this Special Issue is to provide a recent overview about ongoing molecular research by top experts in the field of skin cancer development and therapy.

### Guest Editor

Dr. Rüdiger Greinert

Department of Molecular and Cell Biology, Skin Cancer Center  
Buxtehude, 21614 Buxtehude, Germany

### Deadline for manuscript submissions

closed (30 January 2024)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
