Foodomics: A New Comprehensive Approach to Food and Nutrition

Message from the Guest Editors

Based on recent developments in chromatography and mass spectrometry technologies, modern -omic approaches have been successfully applied in food and nutrition sciences, with the aim to obtain the systematic definition and quantitation of subsets of biomolecules present in raw vegetable and animal materials used as foods, information on corresponding molecular modifications after their technological processing and/or following their ingestion in the human body, but also to investigate the functional effects of specific foods/diets on model animals or humans. About ten years ago, this complex and interesting research field was originally termed *Foodomics* (Cifuentes A. 2009. Food analysis and Foodomics. J. Chromatogr. A 1216, 43: 7109). It is very probable that nobody at that time (including those who first used this term in a scientific article) imagined that in the future, this word would have been used by such a large number of scientists working in the field of food and nutrition sciences.

Guest Editors

Dr. Andrea Scaloni

Proteomics & Mass Spectrometry Laboratory, ISPAAM-National Research Council, 80147 Naples, Italy

Dr. Gianluca Picariello

Institute of Food Sciences, ISA-National Research Council, 83100 Avellino, Italy

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
