Metabolic Bone Diseases: Pathophysiology and Molecular Biology

Message from the Guest Editors

Nowadays dramatic demographic changes towards an aging society along with a quiescent lifestyle results in a raised incidence of metabolic diseases worldwide, such as diabetes mellitus type 2. Many of these diseases affect bone metabolism. Indeed, there are more than 70 diseases and health conditions reported causing so-called metabolic bone diseases—characterized by bone pain, altered posture, and poor bone quality (e.g. osteopenia or osteoporosis), and consequently an increased fracture risk. This Special Issue will contain a collection of manuscripts that describe investigations into the different stages of bone metabolic diseases, reflecting our current knowledge and describing several diseases and the underlying molecular mechanisms, molecular diagnostics, and novel molecular treatment/therapeutic options.

Guest Editors

Prof. Dr. Andreas K. Nüssler

Siegfried-Weller Institute for Trauma Research, BG Trauma Center, University of Tuebingen, Schnarrenbergstrasse 95, 72070 Tuebingen, Germany

Dr. Sabrina Ehnert

Department of Trauma and Reconstructive Surgery, Siegfried Weller Research Institute, Eberhard Karls University Tuebingen, BG Trauma Center Tuebingen, 72076 Tuebingen, Germany

Deadline for manuscript submissions

closed (31 October 2019)

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
