Metabolic Regulation in the Development of Cardiovascular Disease and Heart Failure

Message from the Guest Editor

This Special Issue aims to present a collection of reviews and original papers that better clarify the pathophysiological, diagnostic, and therapeutic aspects of metabolic regulation related to the risk of cardiovascular disease occurrence through to the onset and progression of heart failure. **Keywords:**

- diabetes
- metabolism
- dyslipidemia
- cardiovascular disease
- heart failure
- diagnosis
- prognosis
- therapy

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
