Tissue-Specific Direct and Indirect Effects of Metformin and Its Application 2.0

Message from the Guest Editor

The pharmacological effect and clinical applications of Metformin, a drug with a long history of use, differ depending on the target tissue, in spite of regulating the same signal pathway. In this review paper, the mechanism of actions of Metformin are divided into direct effects on target tissues and indirect effects via non-targeted tissues. Beginning with the mechanism by which Metformin is distributed to the target tissue, diverse actions of Metformin in tissue-specific applications and its representative cases are introduced. In particular, DNA, RNA, protein, as well as microRNA regulation by Metformin in specific tissues are covered. In addition, indirect effects of Metformin on non-targeting tissue as well as how Metformin is applied to disease control in this indirect pathway are mentioned.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
