

Special Issue

Interaction between Plants, Microorganisms, and Soils in Different Ecosystems

Message from the Guest Editors

This Special Issue intends to improve our understanding of the “Interaction between the Plant Rhizosphere and Soil Organisms”. Submissions could consist of research on topics including but not limited to:

- Diversity of soil microorganisms;
- Soil microorganisms in forest ecosystems;
- Rhizosphere diversity;
- Interaction between plants and their microbial communities;
- Functions of rhizosphere microorganisms;
- Microorganisms synthesizing plant growth regulators;
- Biological plant protection;
- Genetic diversity among soil microbial communities;
- Novel bioactive compound isolation and identification in plants and soil.

We would like to take this opportunity to welcome the submission of research articles, reviews, as well as technical notes and communications, on these related topics.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
