Contribution of Dysfunctional Microvasculature to Cardiovascular Diseases

Message from the Guest Editor

Microvascular endothelium is crucial for the oxygenation and nutrition of tissues. The integrity and barrier function of the endothelium is maintained by intercellular junctions. However, when microvascular endothelial cells become dysfunctional, a decreased barrier function will occur. Activation of the endothelium by damage- or pathogen-associated molecular patterns (DAMPs/PAMPs), disturbed flow, Ox-LDL, or decreased nitric oxide causes upregulation of adhesion molecules such as ICAM-1 and VCAM-1 and NF- κ B mediated cytokine expression. Upon dysfunction, fluids, ions, and cells can cross the endothelium and leak into the underlying extracellular matrix, causing inflammation and negatively affecting the blood vessel wall and cardiovascular disease progression. **Keywords:** endothelial cells; angiogenesis; leukocyte transmigration; intercellular junctions; hemorrhage; inflammation; leaky neovessels; barrier function

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
