

Special Issue

Mitochondrial and Calcium Signaling in Human Health and Disease

Message from the Guest Editor

Calcium is thought to play an important role in regulating mitochondrial function. Mitochondrial calcium has long been recognized as a fundamental signal in a plethora of cellular functions, ranging from the control of metabolism and ATP production to the regulation of cell death. The Special Issue welcomes original research articles and reviews covering many aspects of molecular biology of mitochondrial and mitochondrial calcium.

Guest Editor

Prof. Dr. Krzysztof Zabłocki

Laboratory of Cellular Metabolism, Nencki Institute of Experimental Biology PAS, 02-093 Warsaw, Poland

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
